

Unity,

Acoustic solutions for anyone , anywhere

About Unity

Fully Customisable

Your Unity can be made to fit dependant on your specific requirements. We pride ourselves in our ability to adapt our solutions to incorporate any AC/ASHP/Refrigeration plant system in the industry providing up to 25 DB reduction across all units.

High Quality Protection

Your Unity is designed to protect your AC/ASHP/Refrigeration plant system from the elements and other external factors, such as vandalism, giving your equipment a longer operational lifetime.

Balanced airflow

Your Unity will provide your system with an optimised airflow so your equipment can operate to its full capability with maximum efficiency. Our use of internal plenum seals will prevent air recirculation within your unit prolonging the lifetime and efficiency of your system.

Ease of access

Your Unity is carefully designed and constructed to enable ease of access to your equipment allowing for regular maintenance.

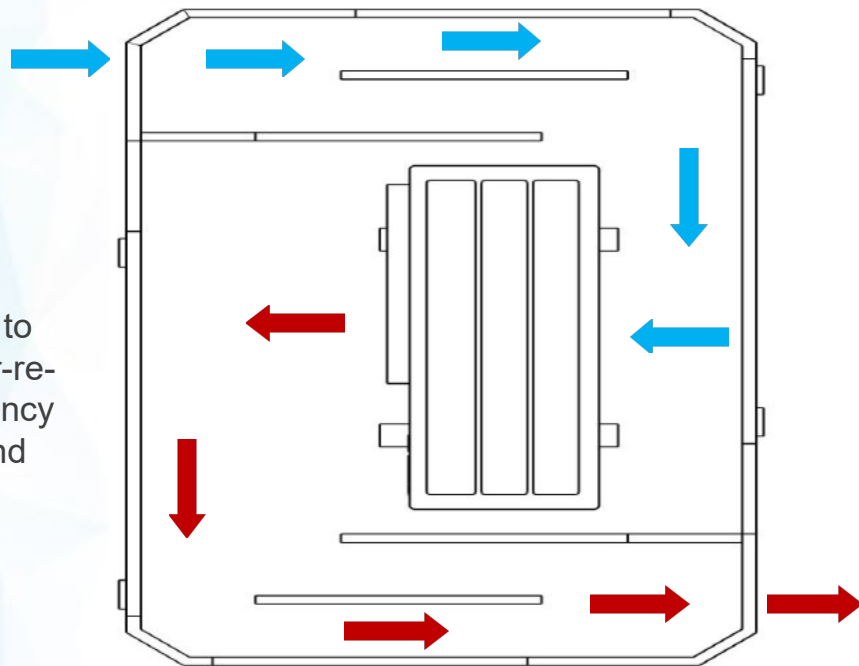

Value for money

With the high quality of our solutions, our dedicated and highly skilled design, manufacturing and customer support teams combined with guaranteed on-time delivery 100% of the time, value for money is guaranteed when you choose Environ Group.

About Unity

Internal Plenum Seals

Our internal Plenum seals are designed specifically to deal with the problems of housing a ASHP/Refrigeration/AC unit. These seals will allow for optimal airflow to the unit housed inside whilst stopping air-re-circulation maintaining the optimal efficiency of your unit whilst keeping it protected and quiet.

Condensate Drain Pan

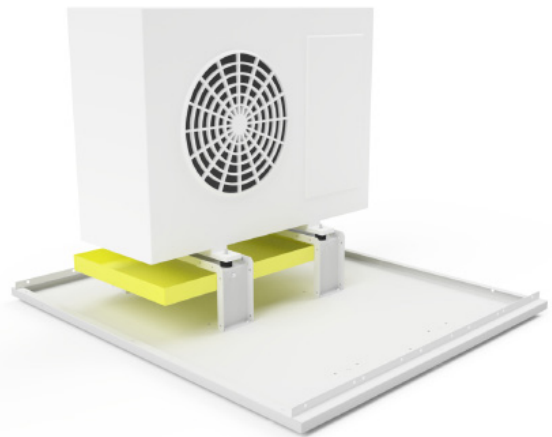

- Collect condensate water
- Protect your equipment
- Protect your equipments surroundings

Anti-Vibrational Mounts

- Reduce vibration
- Reduce noise output
- Improve stability
- Protect your equipment

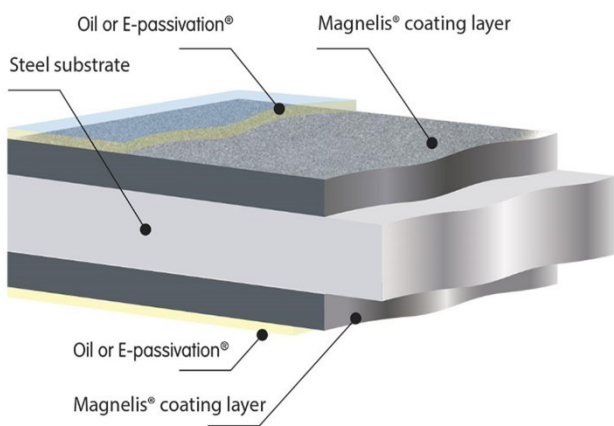

Drain Pan Heater Tape (optional)

- Maintain ambient temperature
- Protect your equipment
- Protect the equipments surroundings

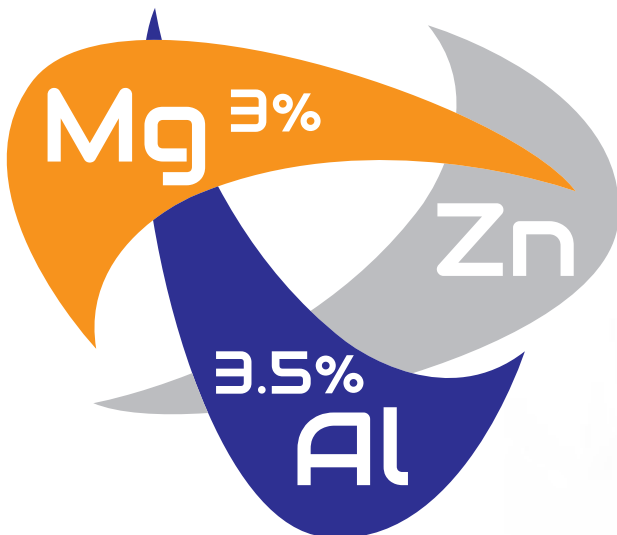

Available in Magnelis Steel

Steel has gone green and we are proud to offer our Unity range, for the first time, constructed entirely from the newly developed, rated category C5 and environmentally friendly Magnelis Steel. Some of the benefits of choosing Magnelis Steel include:

- Superior corrosion resistance: three times better than galvanised steel (outdoor tests)
- Environmentally friendly
- Best and most cost-effective alternative to post-galvanised steels.
- The Self-Healing Effect ensures excellent edge protection
- Excellent processing properties

About Us

Environ Group are now based in St Neots, Cambridgeshire, and serves customers across the U.K. and Europe. With many years of experience, our highly skilled team is dedicated to delivering quality-engineered solutions and providing a complete customised service, from our industry leading Acoustic Enclosures to custom metalwork. We recognise that understanding our client's requirements and goals is the key to our success. With that in mind, here is what you can expect when you decide to work with us.

Professional Customer Service

We're here to help. Our customer service team will be on hand to assist you every step of the way, as well as our highly skilled design and manufacturing teams who can be available to answer any specific queries you may have about your Unity

Pioneering Technology

Environ Group has pioneered the development and manufacture of a range of propriety acoustic enclosure systems, designed to reduce noise from outdoor machines commonly used in the comfort cooling and refrigeration industries. We continue to lead in the industry with our innovative designs and, to improve our products as new knowledge and technology becomes available.

U.K. Manufactured

With an enthusiastic team of specialists in acoustic solutions, sheet metal and structural products based at our manufacturing and distribution facility in Cambridgeshire, Environ Group have the capacity to design, manufacture and deliver our solutions across the U.K..
